What's in your Medicine?

May 12, 2019

At Nova Dispensary, we go above and beyond state regulations and sell only quality tested flower and provide our patients with reasonably-priced quality products that have verified test results.

Nova's management has personally vetted our suppliers to ensure that our products are always top-tier and safe to consume. From banning cutting agents such as PG, PEG, and VG in our vape pens, to only working with growers who use organic inputs, Nova is adding an "extra layer of protection" between you and your medicine.

Consistent dosing and potency is a key factor in effective medication, and Nova selects only products from reputable companies who have proven to test consistently and provide the information needed by our patients for our well being.
